CRANE MODEL IDENTIFICATION

F365RA.2.26 e-dynamic

F = Fassi

365 = Crane model coming from the lifting capacity (kNm). Theoretical design capacity: example "365" kNm (36,5 tm)

R = Continuous rotation

A = Fassi series

"A" means 1st crane generation belonging to the same lifting class, "B" 2nd generation and so on. The following letters specify the crane version identity: C for short version, F for fixed position mounting, FM for fixed marine range, AS for handling of stored materials on pallets, SE for dry walls, XS for extra speed, Z for foldable crane in a Z-shape ... etc.

2 = Number of linkages: 0-without linkage; 1-single linkage; 2-double linkage (on both articulations)

26 = Number of articulations and hydraulic extensions of the outer boom. Example: "2" articulations, "6" extensions.

6 = For **TECHNO** cranes only the number of hydraulic extensions is specified.

e-dynamic = Identification of the crane set-up: active; e-active; dynamic; e-dynamic; xe-dynamic; he-dynamic; xhe-dynamic; techno

CRANE SET-UP

- **active:** Related to cranes without linkage (version "0"), with dual side manual ground control stations and CE* safety devices. HC1 HD4 S2 lifting class according to EN 12999:2020 standards.
- **e-active:** Related to cranes without linkage (version "0"), one side manual ground control station, RCH/RCS radio remote control, XP device (where required) and CE* safety devices. HC1 HD4 S2 lifting class according to EN 12999:2020 standards.
- **dynamic:** Related to cranes with linkages (version "1"-single linkage and "2"-double linkage), dual side manual ground control stations and CE* safety devices. HC1 HD4 S2 lifting class according to EN 12999:2020 standards.
- **e-dynamic:** Related to cranes with linkages (version "1"-single linkage and "2"-double linkage), one side manual ground control station or emergency manual control at column side, RCH/RCS radio remote control, XP device (where required) and CE* safety devices. HC1 HD4 S2 lifting class according to EN 12999:2020 standards.
- **xe-dynamic:** Related to cranes with linkages (version "1"-single linkage and "2"-double linkage), one side manual ground control station or emergency manual control at column side, RCH/RCS radio remote control, XP device and CE* safety devices. HC1 HD5 S2 lifting class according to EN 12999:2020 standards.
- **he-dynamic:** Related to heavy duty crane range over 500 kNm with linkages (version "2"-double linkage), continuous rotation, RCH/RCS radio remote control, outriggers controlled by radio, XP device (where required) and CE* safety devices. HC1 HD4 S2 lifting class according to EN 12999:2020 standards.
- **xhe-dynamic:** Related to heavy duty crane range over 500 kNm with linkages (version "2"-double linkage), continuous rotation, RCH/RCS radio remote control, outriggers controlled by radio, XP device, CE* safety devices, touch screen colour display and carbon look carter. HC1 HD5 S2 lifting class according to EN 12999:2020 standards.
- **TECHNO:** Related to heavy duty crane range over 500 kNm with linkages (version "2"-double linkage), continuous rotation, V7 radio remote control, outriggers controlled by radio, XP device, CE* safety devices, FX991 touch screen colour display and carbon look carter. HC1 HD5 S2 lifting class according to EN 12999:2020 standards.

*CE mark: it was established by the European Community and it attests that product meets the minimum legal and technical requirements of the Member States of the European Union.

* Maximum load of 995 kg is required for cranes without a lifting moment limiting device, with the mandatory use of a load limiting device (MLC - Micro Load Control) to ensure that this limit is not exceeded

▨▨▨ The manual extension is protected by the lifting moment limiting device (when cranes are equipped with it) and therefore does not need the MMC system
